

Creating a PDF Using Adobe Acrobat

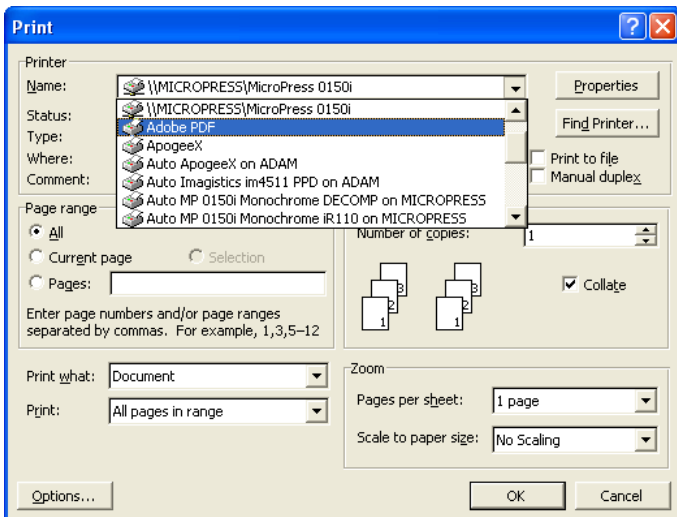

Open the document you would like to convert.
The examples shown are from Microsoft Word.
Click File and select Print.

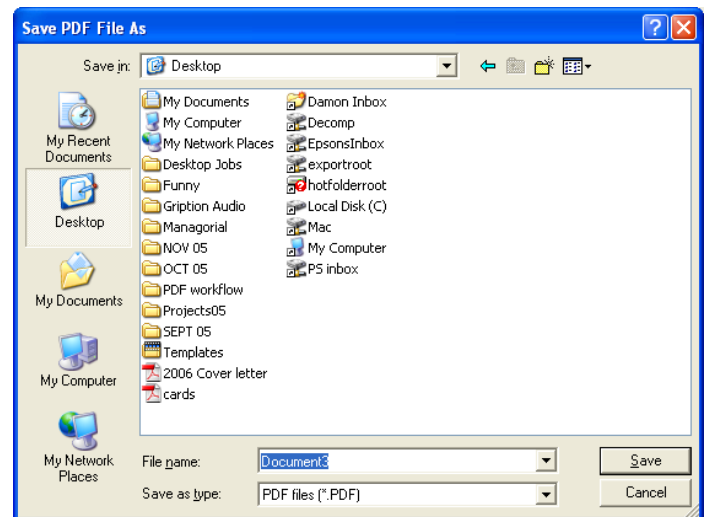

In properties, the default setting should read Press Quality. Click View Adobe PDF results. Click OK.

Select the Adobe PDF printer. Select properties

Name the file and save in a location you are familiar with.

The pdf will open automatically. Look over the pdf and make sure everything is as you intended.

The pdf is now ready to send.
